

Miss Hoyle's Newsletter

October 20, 2023

Science	We finished our unit on Force & Motion! We learned about the Wheel & Axle and the Pulley, and how they use force to make our work easier. We learned about the disadvantage of simple machines.
Math	We spent the week learning more about multiplication facts. We learned strategies for solving multiplication facts (0-12). We used IXL to practice and build on other 3rd grade math skills.
Writing	We had a fun week writing stories to go with the mystery "Harris Burdick" pictures! We used our imaginations and created stories to go along with the pictures we saw. Check out the link to the book on my website!
Reading	We continued reading "The Wild Robot." We learned how to use inferencing skills. We learned more about character traits, using a 4-square in our reader's notebooks to collect our traits and evidence from our books to support them.
