<b>Writing</b>	<b>We have started our Personal Narrative unit (true stories about us). We've made lists of noteworthy people, places and events in our lives. They have chosen their seed idea and begun writing about it.</b>
<b>Reading</b>	<b>We are working on our unit about building a reading life! We are reading the book "The Wild Robot." We are learning about our characters. We are making predictions and reviewing how to retell a story.</b>
<b>Math</b>	<b>We used mathematical models to measure elapsed time. We represented and interpreted data using scaled bar graphs. We used drawings and number models to represent and solve multiplication number stories. They were introduced to division and shared division number stories. We developed strategies for solving 2's, 5's and 10's facts for multiplication.</b>
<b>Science</b>	<b>We learned about the scientific method! We've learned how a scientist identifies a problem, asks questions, creates a hypothesis, creates an experiment and tests their experiment.</b>
<b>Handwriting</b>	<b>We reviewed and practiced proper letter formation!</b>
