

Scaled Bar Graph

Home Link 3-7

NAME _____

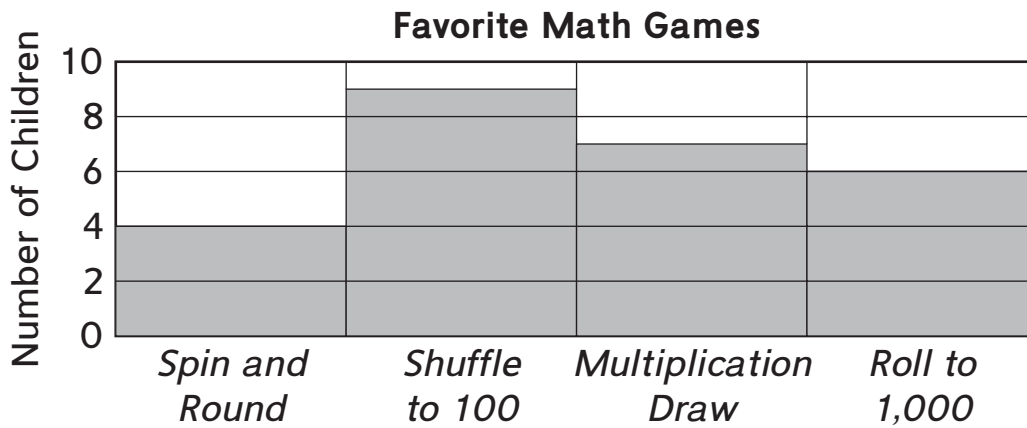

DATE _____

TIME _____

Family Note Today your child sorted pattern blocks and created a bar graph with a scale of more than 1 to represent the data. Scales on bar graphs should have equally spaced intervals to represent data, such as below, where the scale is marked in intervals of 2.

Please return this Home Link to school tomorrow.

Talk to someone at home about the data shown on the bar graph below. Then use the information shown on the graph to answer the questions.

- ① How many more children chose *Shuffle to 100* than *Multiplication Draw*? ____
- ② How many more children chose *Roll to 1,000* than *Spin and Round*? ____
- ③ How many fewer children chose *Shuffle to 100* than the combined total of children who chose *Roll to 1,000* and *Multiplication Draw*? ____
- ④ Write your own question about the graph. Then write the answer.
