

Multidigit Multiplication

Home Link 9-5

NAME _____

DATE _____

TIME _____

Family Note Today your child multiplied 2-digit numbers by 1-digit numbers using area models. Children drew a rectangle to represent the multiplication problem and then broke apart the larger factor into smaller, easier-to-multiply numbers.

Please return this Home Link to school tomorrow.

Use the break-apart strategy to solve the multiplication problems. Draw and partition a rectangle. Then record number sentences to show how you broke apart the factor.

Example:

$$3 \times 28 = 84$$

Two ways to break apart 28 to help solve 3×28 .

① $5 \times 42 = \underline{\hspace{2cm}}$

② $6 \times 54 = \underline{\hspace{2cm}}$

③ Explain to someone at home how you broke apart the larger factors.
